# Cosmetic Laser Dermatology

*Goldman, Butterwick, Groff, Fabi, Wu, Boen, & Fletcher*

As San Diego's #1 destination for beautiful skin with 100,000+ satisfied patients, Cosmetic Laser Dermatology has been a leader in the art and science of skin rejuvenation for more than 30 years.

"By combining cutting-edge laser, light, and energy-based technologies with impeccable service and the expertise of our six board-certified dermatologists," says Dr. Mitchel Goldman, founder and medical director, "we're able to produce unparalleled and natural-looking results."

Our robust services include 50+ lasers to improve texture, tone, and wrinkles; liposculpture and body-contouring devices, such as CoolSculpting® and Thermi®; sclerotherapy for leg, chest, and hand veins; and cosmetic fillers and injectables like Botox® to smooth wrinkles. Our artform is crafting these modalities into unique combination treatments for each patient's individual needs.

We were one of the first in the country to carry Jeuveau™, a new wrinkle smoother, and add Cooltone™, the muscle-defining counterpart to CoolSculpting®, to our body-contouring lineup. In 2019, we created our proprietary Take10 procedure, which uses a combination of lasers and injectables to take 10+ years off the face in a single treatment.

Further elevating Cosmetic Laser Dermatology's commitment to the community is its neighboring sister practice, West Dermatology & Skin Cancer Center, which serves general dermatology needs, including Mohs surgery, and accepts most medical insurance.

Finally, the practice's participation in over 300 FDA-approved clinical studies, which often allows patients FREE treatments using the latest technology and products, showcases the team's ongoing commitment to advancing the fields of cosmetic and medical dermatology.

"Our goal with each patient is to inspire happiness," Dr. Goldman says. "We do this by delivering natural, cost-effective results with minimal downtime or the need for surgery."

For a complimentary consultation or to enroll in a clinical study, please contact Cosmetic Laser Dermatology, and follow @CosmeticLaserDermatology on Instagram for Insta-only promotions. ■
